DOES NOT CONTAIN: Wheat, gluten, soy, milk, eggs, fish, crustacean shellfish, tree nuts, peanuts

Available in 4 fluid ounces

SUGGESTED USE: 1 teaspoon (5 ml) 2 times daily or as directed by your healthcare practitioner. Shake well before using.

FEATURING

Elecampane Root

Europeans and the American Eclectic herbalists valued this root for its soothing, nutritive tonic qualities. Elecampane encourages healthy mucilage and bronchial function. It assists in nourishing and strengthening the respiratory system to help withstand recurring challenges.*

Sundew and Lobelia

Traditional herbalists chose these plants to help relax respiratory tract muscles and to support healthy nervous system response. Lobelia has been used by both Native Americans and by American herbalists to support respiratory tract health. The unusual, insectivorous plant Sundew also encourages the immune system's natural response.*

Plantain

An esteemed wayside plant, popular worldwide for millennia, Plantain is used by herbalists and as a home remedy to support many aspects of well-being. In modern times, this soothing herb has been approved by the German Commission E to support respiratory tract health. Plantain naturally contains calcium, allantoin, mucilage and vitamins C, K and A.*

Mullein and Horehound

These are two time-trusted favorites of many herbal traditions to support the respiratory system, historically used in herbal compounds. Mullein is known for its soothing qualities and promotes relaxation of muscles, while Horehound is known as a gently stimulating tonic; both encourage a favorable respiratory tract response.*

Fenugreek and Thyme

Traditionally, herbalists often combined these herbs for respiratory system support. Fenugreek, an important herb to the Greeks, is also used in Chinese and Ayurvedic herbal traditions. Thyme, containing beneficial essential oils, is picked at summer's end in Provence, France for use in the winter. Herbal traditions used both these herbs to promote a clear and healthy respiratory tract and sinus cavity.*

Malabar Nut Tree

For thousands of years, the leaves of the Malabar Nut tree have been prized in Ayurvedic medicine to encourage respiratory and bronchial health. Adhatoda vasica leaves, rich in carotene, vitamin C and essential oils, support relaxation of the respiratory system muscles.*
